

PRATUS™ FOR CONTESTED LOGISTICS

Supply & Sustain Operations with AI-Driven Decision-Support

WHAT IS PRATUS?

PRATUS, a premier Microsoft partner, is a decision-support software suite designed to enhance planning, intelligence, operations, and logistics for crisis management. From complex evacuations to national security threats and extreme weather events, the platform empowers organizations with real-time insights and coordinated response capabilities.

FEATURES

PRATUS delivers real-time data for informed decision-making while enabling frictionless communication via the Microsoft 365 integration. Key features include:

REAL-TIME THREAT ASSESSMENT

- Observe social media, weather threats, power outages, and economic disruptions affecting your area of responsibility (AOR).
- Use DisasterGPT™ for real-time situational awareness, AI-driven threat snapshots, and rapid decision-making.
- Get AI-generated objectives, actions, and resources for effective responses.
- Anticipate and mitigate disruptions with predictive weather analytics, including the Energy Reliability Index.

UNIFIED LOGISTICS & OPERATIONS

- Track resources in real time and optimize incident management with DisasterGPT for smooth coordination.
- Consolidate logistics, personnel deployment, and asset management into a single operational workspace.
- Gain real-time operational visibility, risk assessment, and informed decision-making with DisasterGPT.
- Adapt quickly to evolving threats with AI-driven mitigation strategies and response actions.

MULTI-AGENCY COLLABORATION

- Coordinate response efforts among various organizations, including partner nations, military branches, and other departments.
- Securely share joint operational files within your Microsoft tenant, improving collaboration through file sharing, co-authoring, and real-time meetings with Microsoft 365 integration.
- Automatically export situation reports to a DocX file, which is then transformed into a detailed PowerPoint using Microsoft Copilot integration.

AT A GLANCE

CURRENT STATE

- Fragmented communications
- Delayed information sharing
- Siloed data
- Inefficient risk assessment

SOLUTION

- Centralized platform
- Real-time response
- Customizable templates
- Geospatial intelligence
- Streamlined operations
