

PRATUS™ FOR LAW ENFORCEMENT

Improving Resiliency & Readiness with AI-Powered Tech

WHAT IS PRATUS?

PRATUS, a premier Microsoft partner, is a decision-support software suite designed to enhance planning, intelligence, operations, and logistics for crisis management. From complex evacuations to national security threats and extreme weather events, the platform empowers organizations with real-time insights and coordinated response capabilities.

FEATURES

PRATUS provides the Law Enforcement with the following features:

IMPROVE SITUATIONAL AWARENESS

- Observe threats and hazards that could impact event operations within your assigned areas of responsibility (AOR).
- Leverage your threat feeds combined with PRATUS-curated public and private threat-related datasets.

OPTIMIZE WORKFLOWS WITH AI

- Use our AI tools to analyze your plans and generate recommended objectives, actions, and resources based on AutoSITREPs' context.
- Harness AI for exercise planning, drawing on historical incident responses and lessons learned.

ASSESS RISKS & REPORT

- Orient to AOR threats with DisasterGPT™ AutoSITREPs, our generative AI solution that assesses data to provide a real-time snapshot of the threat environment.
- Evaluate weather risks with tools such as power outage prediction, and analyze how adverse or severe weather is impacting your operations.

MANAGE INCIDENTS & RESOURCES

- Streamline incident and resource management and effectively assign tasks with the Microsoft 365 integration.
- Manage incident action planning alongside ICS forms within PRATUS and automatically share them in your Microsoft Teams channel for secure information exchange.
- Gain continuous feedback through event analysis and after-action reviews to improve response and exercise training events.
- Ensure multi-agency coordination through Microsoft Teams and integrated third-party solutions.

AT A GLANCE

CURRENT STATE

- Multi-agency coordination challenges
- Lack of unified communication
- Limited intelligence sharing

SOLUTION

- Coordinated response via Microsoft 365 integration
- AI-powered situational intelligence
- Frictionless intelligence & communication sharing
- Automated resource allocation
- Proactive risk mitigation
